

Complete Placement Preparation Roadmap

From Zero to Hero in 6-8 Months

Service-Based & Product-Based Ready

Complete 8-Month Roadmap

Critical Truth

You must be fully prepared before 4th year placements begin! Starting preparation in final year is the biggest mistake students make.

What You'll Crack

Service-Based: TCS, Infosys, Wipro, Cognizant, Accenture, Capgemini

Product-Based: Zoho, Deloitte, Tech Mahindra, Early-stage Startups

Off-Campus: Amazon, Microsoft, Flipkart (with dedicated effort)

Months 1-2 **Aptitude & Reasoning (60 Days)**

Foundation is crucial. Service-based companies have aptitude tests in first rounds.

Months 3-4 **CS Fundamentals (8 Weeks)**

OOPS, DBMS, OS, Computer Networks - these 4 subjects are asked in every technical interview.

Months 5-7 **DSA - Data Structures & Algorithms**

Key for product-based companies. Follow Striver's A2Z DSA Sheet. Solve 3-5 problems daily consistently.

Month 8 **Projects, Resume & Mock Interviews**

Build 2-3 solid projects, perfect your resume, and take mock interviews to build confidence.

💡 **Success Principles**

- 💡 Consistency > Intensity - Daily small steps beat irregular big efforts
- 💡 Maintain Notes - Document aptitude formulas, CS concepts, DSA patterns
- 💡 Practice Daily - 2nd year: 2-3 hours | 3rd year: 4-5 hours minimum
- 💡 Weekly Revision - Review everything you learned each weekend
- 💡 Mock Tests - Take one mock test every week to track progress
